Putting the Patient First

**Patient-Centered Medical
Home**

What is a Medical Home?

A medical home is a clinic or a medical office where a team of health care professionals use the most up-to-date technology and knowledge to provide care for the whole person. We coordinate your care with local specialists and healthcare providers to provide the absolute best service to our patients. Specialists integrate medical records and communication with our systems, and local Behavioral health professionals work closely with our primary care providers to insure continuity of care and quality of life.

A Medical Home puts the patient FIRST!

Being Patient-Centered means that you will get the care that you need in an environment that puts YOU first, no matter where you're from or who is paying for your care!

If you need assistance with obtaining insurance, speak with our receptionist, billing staff, or you can review the materials available in our waiting area.

The Medical Home Team

The Medical Home team is a partnership. You and your family members work with your primary care provider as a team along the other health care professionals to make sure you get the right care to get healthy and stay healthy no matter your age.

The Medical Home Team will:

1. Get to know you and your family
2. Make sure you understand your treatment and options for care
3. "Coach" you as you learn to care for yourself by providing support and information to help you get and stay healthy
4. Coordinate your care with any specialists or other medical professionals involved in your care.

How Can You Join Our Medical Home?

It's easy to set up an appointment in our primary care offices! First, we'll need your medical records; you can download the medical records request form at www.reddymedicalgroup.com, fill it out, and fax it to 706-621-7575. We will request your records from your current provider and any specialists, and will contact you for an appointment. Patient registration forms are available at www.reddymedicalgroup.com if you would like to print, complete and bring with you to your appointment.

If you have any questions about this process, you may contact Becky Coker at 706-621-7575, extension 1002.

How YOU can help your Medical Home Team:

1. Learn about your condition and what you can do to stay healthy
2. Follow your treatment plan
3. Ask questions
4. Make sure to bring your medications with you to each visit
5. Let your team know if you get care from another health care provider
6. Communicate with your health care team. If you are unsure, always ask questions
7. Tell us how we are doing. Our goal is to work with you to provide you a great experience
